TARGET PARTICIPANTS (GOAL)	PROVEN Q2 SOLVERS (TRACK RECORD)	TARGET COUNTRIES	PROJECTED TEAMS	LIVE COMPETITION

contact@secleaf.xyz • https://ctf.secleaf.tech

Connecting Serious Security Talent with Hiring Teams

SecLeaf was founded in Nagpur, India in September 2025. We run practical, hands-on security competitions where students and engineers prove their skills on real-world challenges, not multiple-choice tests.

SKILL-BASED HIRING

Hire by Solves, Not Keywords

Traditional recruiting filters out great hackers because they lack standard keywords. SecLeaf lets sponsors identify talent based on real-time problem-solving performance under competitive pressure.

HANDS-ON CHALLENGES

Realistic Threat Scenarios

40+ curated challenges in Binary Exploitation, Cloud Security, AI/LLM Security, Digital Forensics, and Reverse Engineering—modeled directly on real vulnerabilities and defender workflows.

GLOBAL REACH

Targeting 100+ Countries

Building on our 40+ country footprint from Q2, Q3 2027 targets over 100 nations. Sponsors get direct brand visibility across university security clubs and active practitioner communities worldwide.

6,000+
Target Competitors
Projected goal for Q3 2027 flagship

3,116
Proven Past Base
Verified registered players in Q2 edition

150+
College Clubs
IITs, NITs, BITS, CMU, Berkeley network

24 Hours
Live Broadcast Desk
Live casters, challenge walk-throughs & sponsor demos

Our Track Record: What We Built in Q2

We don't sell unverified projections as finished facts. Here is our verified data from our previous edition, showing high completion rates and real community trust.

VERIFIED PAST RESULT

3,116

Total Registrations

+42% growth over inaugural competition

HIGH PARTICIPATION

92.9%

Active Solvers

2,896 active solvers (industry average is ~55%)

ACTIVE SQUADS

769

Competing Teams

Coordinated student & workplace squads

GLOBAL FOOTPRINT

40+

Countries in Q2

Targeting 100+ countries for Q3 2027

Past Community & Industry Collaborations

ORGANIZATIONS THAT BACKED US

Organizations that supported our previous editions with challenge tracks, platform licenses, community prizes, and technical sessions:

- TryHackMe
- INE Security
- Caido
- BSides Vadodara
- Legal Data Forensics
- Crypto Forensic Tech
- ThunderCipher Security
- BlackShell Tech

Who Competes: Demographics and Roles

SecLeaf attracts self-taught security researchers, computer science students, and working engineers who spend their weekends solving technical problems and finding bugs.

Geographic Footprint

TARGET SPLIT

India & Asia-Pacific	40% (2,400+ goal)
Americas (US, Canada, LATAM)	28% (1,700+ goal)
Europe & United Kingdom	22% (1,300+ goal)
Middle East & Africa	10% (600+ goal)

Role Distribution

COMMUNITY PROFILE

CS Students & Grads	40%
Security Engineers & Red Teamers	35%
SOC Analysts & Bounty Hunters	25%

150+ University Hubs

STUDENT NETWORK

Active club partnerships across premier universities:

- **India:** IIT Bombay, Delhi, Kanpur, Madras, NITs, BITS Pilani.
- **USA:** Carnegie Mellon, UC Berkeley, UIUC, Georgia Tech.
- **Europe:** Cambridge, Oxford, ETH Zurich, TU Munich.
- **APAC:** NUS & NTU Singapore, Tokyo Cyber, Korea BoB.

JOB ROLES & ALUMNI WORKPLACES IN OUR COMMUNITY:

Target Roles: Application Security Engineer • Penetration Tester • Red Team Operator • Reverse Engineer • SOC Analyst • Cloud Security Specialist • Vulnerability Researcher • Cryptanalyst • DevSecOps Lead • Incident Responder

Alumni & Competitor Workplaces: Google • Microsoft • AWS • CrowdStrike • SentinelOne • Snyk • Palo Alto Networks • Razorpay • CRED • HDFC Bank • TCS • Infosys • Accenture • Trail of Bits • EY • KPMG

Why Companies Sponsor SecLeaf

Four clear ways your company benefits: hiring vetted engineers, getting hands-on adoption for your security tools, brand exposure, and live stage presence.

PRIMARY TALENT ADVANTAGE — BENEFIT 01

Vetted Resume Bank (Top 5% Solvers)

Skip keyword filters and recruiter agency fees. Sponsors receive direct access to our opt-in resume bank containing verified candidate CVs, GitHub repositories, LinkedIn profiles, and solve analytics from the **Top 5% performers**.

- **Verified Skills:** Candidates proved their abilities by solving real exploitation and reverse engineering challenges under timed conditions.
- **Direct Outreach:** Your talent team can email candidates directly with priority interview invitations.

PRODUCT IMMERSION — BENEFIT 02

Custom Challenge Co-Creation

Hackers ignore static ads—they spend hours breaking down problems. We co-design dedicated challenges built around your software, API, cloud SDK, or hardware security device.

- **Real Hands-on Adoption:** Competitors actively test, interact with, and learn your tooling during the event.
- **Community Writeups:** Top solvers publish public walkthroughs detailing how they interacted with your platform.

BRAND VISIBILITY — BENEFIT 03

Brand Exposure to 6,000+ Hackers

Your logo is featured on the CTF registration portal, the real-time dynamic scoreboard, digital achievement certificates issued to all solvers, and in dedicated social announcements across LinkedIn and X reaching over 100,000 views.

STAGE PRESENCE — BENEFIT 04

24-Hour Live Stream Stage

Feature your security leadership, engineers, or founders in an on-air keynote or technical interview streamed live to thousands of concurrent viewers worldwide throughout the 24-hour event.

Sponsorship Packages & Deliverables

Four straightforward tiers designed for clear return on investment. All pricing is in USD and tiers are strictly capped to ensure premier sponsor visibility.

Deliverables & Benefits	DIAMOND	PLATINUM	GOLD	SILVER
Direct Investment (USD)	**$10,000**	**$6,000**	**$3,600**	**$1,800**
Slots Available (Strictly Capped)	**Exclusive (3 Slots)**	Limited (5 Slots)	Limited (8 Slots)	Available (12 Slots)
Vetted Resume Bank Access	**Full Opt-in Bank (Top 5%)**	Top 10% Solvers Bank	Top 25 Opt-in Resumes	Top 10 Opt-in Resumes
Custom Technical Challenges	**2 Custom Challenges**	1 Custom Challenge	Category Pin	Standard Category
Logo on Platform & Live Scoreboard	**Primary Header Logo**	Prominent Tier Banner	Featured Logo	Grid Logo
Logo on Digital Solver Certificates	**Signature Partner Logo**	Prominent Logo	Standard Logo	—
Live Stream Broadcast Inclusion	**Keynote + 20-min Interview**	20-min Interview	Stream Ad Bumpers	Logo on Stream Ticker
Dedicated Discord Channel & Role	**Branded Room + Custom Bot**	Dedicated Channel + Role	Official Sponsor Role	Official Sponsor Role
Social Media Announcements	**3 Dedicated Campaigns**	2 Targeted Posts	1 Announcement Post	Group Shoutout
Email Announcement to Competitors	**Dedicated Standalone Email**	Co-Branded Inclusion	Event Digest Mention	Digest Mention

Custom Sponsorship Add-Ons

Add-ons you can attach to any tier to get more hiring face-time, showcase your security product, or put your brand on physical swag.

Sponsored Challenge Track — $3,500

Own an entire specialized category (such as Cloud Defense or AI Security). All challenges in that track feature your product documentation and API. Competitors solve problems using your developer tools.

Live Technical Interview & Demo — $2,000

A dedicated 20-minute live spotlight during prime hours on the official 24-hour YouTube and Twitch stream. Feature your security architect or engineering lead walking through a real technical topic.

Recruiter Speed-Networking Session — $2,500

Direct video call access to the Top 20 solving teams immediately following the competition. Run 1-on-1 chats, share engineering job openings, and fast-track interviews with top performers.

Hardware PCB Badge & Swag Partner — $4,000

Your logo printed directly onto custom electronic PCB badges, event hoodies, and swag boxes shipped to top 50 winners and college club leaders worldwide.

First-Blood Category Bounty Sponsor — $1,000 / Category

Fund an instant cash bounty ($1,000) for the first team to solve the hardest challenge in your chosen category, announced live with your brand name.

Get in Touch with the Founders

SecLeaf was founded in Nagpur, India by cybersecurity practitioners. Reach out directly to discuss your hiring needs, challenge integrations, or custom sponsorship deliverables.

FOUNDER & TECHNICAL LEAD

Aditya Pidurkar

Principal Co-Founder, SecLeaf

Leads platform architecture, competition operations, and enterprise partner integrations. Built SecLeaf from community origins to thousands of active international competitors.
